INDEX TO VOLUME 52

Abrahams I. D. see *Lawrie J. B.*

Barrero A. see *Fernandez-Feria R.*

Barton P. G. and *Rawlins A. D.*—Acoustic diffraction by a semi-infinite plane with different face impedances 469

Billger D. V. J. and *Wall D. J. N.*—A time domain algorithm for the reflection of waves on a viscoelastically supported Timoshenko beam 211

Billingham J. see *King A. C.*

Bish R. L.—Rotationally continuous plastic flow 645

Body G. L. and *Ehrenmark U. T.*—Second harmonics generated by a bounded standing wave on a plane beach of arbitrary slope 525

Brown S. N. and *Smith F. T.*—Spot concentrations of large-amplitude disturbances in laminar boundary layers 269

Caviglia G. and *Morro A.*—Existence and uniqueness in the reflection–transmission problem 543

Colton D. and *Potthast R.*—The inverse electromagnetic scattering problem for an anisotropic medium 349

Cooker M. J.—Potential flow for a steady jet in a wedge 127

Dai H.-H. see *Rui B.*

Ehrenmark U. T. see *Body G. L.*

Fernandez de la Mora J. see *Fernandez-Feria R.*

Fernandez-Feria R., *Fernandez de la Mora J.*, *Perez-Saborid M.* and *Barrero A.*—Conically similar swirling flows at high Reynolds numbers 1

Flavin J. N. and *Rionero S.*—The Bénard problem for nonlinear heat conduction: unconditional stability 441

Green M. R.—Instabilities arising due to the interaction of a circular jet with a bounding rigid circular shell 141

 © Oxford University Press 1999

Hammerton P. W.—Comparison of Lam–Rott and Brown–Stewartson eigensolutions of the boundary-layer equations 373

Hill J. M. and *Spencer A. J. M.*—Some dynamic shear flow problems for granular materials 253

Hill J. M., *Shi J.*, *Tordesillas A.* and *Wu Y.-H.*—The velocity field for the punch problem for dilatant granular materials 99

Hua Li see *Loy C. T.*

James D. A.—Acoustic scattering from semi-infinite, rigid plates: a new technique 183

Jenkin M. S. see *Shail R.*

Jones D. S.—Effect of end taper 311

Jones M. C. W.—Nonlinear nearly Wilton ripples between two uniform stream flows 237

King A. C., *Billingham J.* and *Popple D. F.*—The moving contact line between two wedges of fluid on a flat plate 453

King J. R., *Ockendon J. R.* and *Ockendon H.*—The Laplace–Young equation near a corner 73

Lacey A. A., *Tzanetis D. E.* and *Vlamos P. M.*—Behaviour of a non-local reactive convective problem modelling ohmic heating of foods 623

Lam K. Y. see *Loy C. T.*

Lawrie J. B. and *Abrahams I. D.*—An orthogonality relation for a class of problems with high-order boundary conditions; applications in sound–structure interaction 161

Levine H.—Unsteady diffusion in a composite medium 499

Librescu L. see *Schmidt R.*

Liu G. R. see *Loy C. T.*

Loy C. T., *Lam K. Y.*, *Hua Li* and *Liu G. R.*—Vibration of antisymmetric angle-ply laminated cylindrical panels with different boundary conditions 55

McIver P. see *Parsons N. F.*

Morro A. see *Caviglia G.*

Norris A. N.—Equilibrium, stability and evolution of elastic plates under the combined effects of stress and surface diffusion 283

Ockendon H. see *King J. R.*

Ockendon J. R. see *King J. R.*

Parsons N. F. and *McIver P.*—Scattering of water waves by an inclined surface-piercing plate 513

Perez-Saborid M. see *Fernandez-Feria R.*

Popple D. F. see *King A. C.*

Potthast R. see *Colton D.*

Rawlins A. D. see *Barton P. G.*

Rionero S. see *Flavin J. N.*

Rui B., Dai H.-H. and *Wong R.*—Uniform asymptotic expansions of an inverse-Laplace-transform integral with applications to problems of wave propagation 327

Rynne B. P.—The well-posedness of the integral equations for thin wire antennas with distributional incident fields 489

Schmidt R. and *Librescu L.*—A general theory of geometrically imperfect laminated composite shells featuring damaged bonding interfaces 565

Scott N. H. see *Shuvalov A. L.*

Shail R. and *Jenkin M. S.*—On the asymptotic expansion of certain functions arising in multiphase Stokes flows 419

Shi J. see *Hill J.*

Shuvalov A. L. and *Scott N. H.*—On the properties of homogeneous viscoelastic waves 405

Smith F. T. see *Brown S. N.*

Spencer A. J. M. see *Hill J. M.*

Ting T. C. T.—The remarkable nature of cylindrically orthotropic elastic materials under plane strain deformations 387

Tordesillas A. see *Hill J.*

Tzanetis D. E. see *Lacey A. A.*

Ursell F.—On the wave motion near a submerged sphere between parallel walls: I. multipole potentials 585

Ursell F.—On the wave motion near a submerged sphere between parallel walls: II. notes on convergence 605

Vlamos P. M. see *Lacey A. A.*

Wall D. J. N. see *Billger D. V. J.*

Wong R. see *Rui B.*

Wu Y.-H. see *Hill J.*

Zlatanovski T.—Axisymmetric creeping flow past a porous prolate spheroidal particle using the Brinkman model 111
